

LIBERUM ASSOCIATION PRESS RELEASE

Gijón, March 14, 2023

THE LIBERUM ASSOCIATION INFORMS that, through the investigation carried out by the **LEGAL TEAM**, regarding batches of COVID-19 vaccines, reported anonymously by citizens during the months of October to December 2022, we were able to prepare a **DOSSIER** of 6,450 pages with the main lots that were reporting to us the partners and citizens in general who, **had suffered a serious adverse effect or sadly, death.**

After completing the investigation and drawing up the conclusions of the **DOSSIER**, we selected a total of **SEVENTEEN LOTS** of the **Pfizer (14) and Moderna (3)** vaccines for having a **HIGH LEVEL OF TOXICITY (SERIOUS ADVERSE EFFECTS + DEATHS)** REPORTED TO VAERS¹. Thus **LEGAL TEAM** evacuated or different writings and requests through the channels of **TRANSPARENCY** to the **SPANISH AGENCY OF MEDICINES AND HEALTH PRODUCTS** and the **GENERAL DIRECTORATE OF PUBLIC HEALTH**.

Thanks to these requests, we have managed to know the total number of lots acquired by Spain, 469 until mid-February 2023 that represent around 217,000,000 million vaccines of which only 107,000,000 million **had been inoculated with a difference of almost 100,000,000 million** that we do not know where they are. It was also known that Spain receives funding from the EU, through **FUNDS** and **REIMBURSABLE LOANS** through the **NEW GENERATION** economic mechanism.

THE SURPRISE CAME YESTERDAY, MARCH 1, 2023 WHEN WE RECEIVED AN OFFICIAL RESPONSE FROM THE AEMPS WHERE WE WERE TOLD THAT THE DECEASED AND THE SERIOUS ADVERSE EFFECTS OF THE LOTS, ONLY OF PFIZER

¹ NATIONAL VACCINE INFORMATION CENTER (NVIC) of the United States of America, which is available to two official bodies, <https://medalerts.org/vaersdb/index.php> or <https://wonder.cdc.gov/> . Both the CDC and the NATIONAL VACCINE INFORMATION CENTER are reported to you by the States (Spain included) the adverse effects of vaccines in general and here in particular of those of COVID-19.

(14), REACHED 199 DEATHS AND 2,326 SERIOUS ADVERSE EFFECTS.

That is, with only 14 batches (of 469) there have been almost half of the deaths that the AEMPS reports in its Farmacovigilance reports (500) and 22% of all serious adverse effects (14,003²).
